Lord O'Hagan, who was to have delivered the oration of the day, was not able to be present, and the lord mayor of Dublin came forward to read it to the assembled multitude. The moment he appeared there was great uproar and confusion. The Fenian amnesty men had moved up to the front of the piatform, and as the lord mayor began to speak they shook the chains attached to their banner in his face, and drowned his voice with shouts of "No whiggery," and loud and long-continued cries for Dr. Butt. The mayor made a second attempt to read the speech, but finding it impos-sible to make it himself he withdrew, and proceeded to his carriage under the protection of the police. Dr. Butt, in esponse to repeated calls, came forward and made a speech, reviewing the career of O'Connell, and thanking the people for their preiseworthy conduct during the day. He was most enthusiasti-cally cheered. Speeches were also made-by Mr. O'Connor Power, member of parliament for Mayo county, and Mr. Suili-van, member for Louth. The rainfall, it is worth noting, seems

o have been most protracted and per-

istent along the line of the Ohio, but the entire area within its influence has embraced the upper Mississippi, lower Missourl, and lower Ohio valleys, Within this territory the temperature for the last two months has been abnormally low. During the month of July, for instance, the average temperature was but a little over eighty degrees; the maximum, ninety, was reached only ones, at two o'clock on the seventeenth, while the minimum was low in the seventies. Another noteworthy fact is, that the prevailing winds have been southerly. These winds have brought the vapor from the gulf, which has been condensed by our low temperature, and thus produced these frequent rains. The phenomena, as recorded by the signal service observer, which have attended these rains goes far to support this theory. The relative humidity of the atmosphere has been low, denoting dryness, and the rains, as we have said, appear to have come with wind almost a ways from the south. Nine times when it has rained so far, the wind has blown from the southeast, three times from the south, and eleven times from the southwest.
